ORGANIZATION

OF THE

CITY GOVERNMENT, JANUARY 4, 1909.

The Mayor and Council met at the council room on the evening of the first Monday of January, 1909. Mayor Nevins called the Council to order at 8.10 o'clock. Records read and approved, and Mayor Nevins then delivered a brief valedictory address.

Mayor Nevins in reviewing the doings of the past year said that he was unable to give a financial statement as the clerk had been unable to prepare one owing to the death of Tax Collector Marvin. In speaking of the permanent repairs for bridges he said that 30,000 feet of planking had been purchased during the past year. The Daniell bridge has been replanked twice during his two terms as mayor at a cost each time of about \$350. A concrete bridge there at a cost of \$600 had lasted 15 years and the planks that were under the concrete were now doing service at the bridge at the Cross pulp mill. He also favored more yard room for the city highway department which could be secured by taking the space now occupied by the I. P. Co.'s store houses for which an annual rental of \$70 is received. He said that Judge Parsons had informed him that the water works had some unexpended cash on hand and that the money would be turned over to the city. The amount would about balance the cost of the Cheney hill extension, \$1,400. City Clerk Daniell stated that the money had been received and deposited in the bank. Mayor Nevins then gave a list of the appropriations and expenditures of the various departments. Taken as a whole the appropriations have not been exceeded by the expenditures, although some of the departments have overdrawn their appropriations.

Following Mayor Nevins' address the council of 1908 adjourned on motion of Councilman Davenport. Mayor-elect Sawyer, Councilman William H. Nelson of Ward 1, Harry J. Carbonneau of Ward 2 and Clarence P. Stevens of Ward 3 were then sworn in by City Clerk Daniell. Prayer was offered by Rev. D. S. Jenks of the First Baptist church. Mayor Sawyer then delivered his inaugural address.

He spoke as follows:

I will say in beginning this short address that it is not my intention to dictate to or advise men who are much more conversant with the vital affairs of our city than I. There are a few points, however, upon which I wish to touch, and I think that they are of importance to us all.

We have no antagonistic interests here in Franklin separated by party discrimination. We all want honest administration, careful expenditure and equal privileges. The party line should not be drawn in so far as these material interests are concerned. We are all aiming towards the improvement of our city, irrespective of party.

It appears that our work is apportioned under several heads as follows: Highways, fire department, police, schools, public buildings, ordinances, street lights, cemeteries, finance, and these departments are looked after by committees from the council.

This method seems to have worked very well, but there appears to have been a growing tendency to a concentration of power in the committees and especially in the chairman of the committee, since the first councils. It seems to me that important measures ought to be threshed out in open council rather than in the committee meeting. I disapprove of star chamber methods of any kind and believe that the people should be informed of everything which concerns their welfare. Although we cannot hope to please everyone, if we follow the expression of sane public opinion, we will not be fare from right.

Several of the departments just referred to are of lesser importance, but our schools, fire department, roads and finances are matters which deserve the most careful consideration.

The conduct of our schools touches the very foundation of our citizenship and should be looked after, as I believe it has been looked after, by a very competent board of education.

The schools and fire protection are the last departments in which we should practice too rigid economy. The fire department at present seems to be well equipped and with few improvements ought to render us good service for several years.

Our roads in Wards 2 and 3 will require and get due attention next summer as the bulk of macadamizing on the state boulevard has been accomplished, Cheney hill put in shape and 1350 feet of macadam laid on Webster street, all of which took most of last summer.

Prospect street and Franklin street now demand attention and I hope and expect to see one or both of them macadamized during my year as mayor.

Our sewer troubles, as far as house drainage is concerned, are practically over save for the connecting link on Central street and the few connections which it will be necessary to make from time to time.

We start in the year with a larger debt than last year, owing to the unusual expense of installing the sewer system, but we do not see before us anything that can this year detract from our financial prosperity. As far as in my power I shall try and make this a successful and

economical year and I ask the co-operation of each gentleman in the council in this endeavor.

I have one recommendation which affects the conduct of the city's business, and that is that all supplies of any amount for every department be purchased from bids, giving the order to the lowest bidder, thus doing away with favoritism and partisanship.

In conclusion, I wish to thank you for the honor you have conferred upon me. I thoroughly appreciate it and wil! do my very best to make the year 1909 as successful as any the city of Franklin has experienced under the leadership of the honored gentlemen who have preceded me in this position.

I realize my deficiencies, but with a wise and helpful council I am sure that we can accomplish what in civic affairs seems to me ought to be the motto of each one of us, "The greatest good for the greatest number."

CITY GOVERNMENT.

Organized January 4, 1909.

CITY COUNCIL.

Mayor.

Elected annually on the fourth Tuesday of November. Salary \$200 a year.

ENOS K. SAWYER.

Councilmen.

Elected by wards for three years. One member from each ward elected on the fourth Tuesday of November annually. No salary.

Term Expires. Ward I-JAMES W. HUNTOON, January 3, 1910 RUFUS P. GARDNER, January 2, 1911 January 1, 1912° WILLIAM H. NELSON, Ward 2-RICHARD W. SULLOWAY. HIGHWAY DEPARTMENT.

HIGHWAY COMMISSIONER'S REPORT.

To the City Council of Franklin:

I herewith submit the following report as Highway Commissioner for the City of Franklin for the year end-

ing 1909.

The outside roads were gone over early in the season, and put in thorough repair though not as promptly as I desired owing to the lateness in getting the new Road Machine. The bridges were not found in as good condition as was expected. I have re-planked in all, six bridges and of these I found Sanborn bridge near No. 1 Paper Mill in a deplorable condition, viz: the under plank all rotten having been in use for 13 years and when taken up would not hold together to handle. This bridge I planked with three inch Georgia Pine across the girders and with two-inch No. 1 spruce plank on top lengthwise. The sidewalk to this bridge was found in equally dangerous condition and was relaid with new material. Total expense of repairing this bridge was \$350.00. On Central street I have spiked up and recovered, full width of street, about 2,000 feet. On same street I have spiked up and redressed 1,000. On Willow Hill I have spiked up and re-dressed 500 feet. On River street I have laid 500 feet of four-inch new macadam road. On Prospect street I have laid 400 feet four-inch new macadam road. On Main street I have spiked up and re-dressed about 900 feet. All the stone carried over from 1908 estimated 3,000 tons is on hand. About 1,000 feet of the sand road (so called) leading towards Sanbornton, has been covered with hard pan.

WILL GORDON,

Highway Commissioner.

Highway Department as Estimated December 31, 1909.

REPORT OF COMMITTEE ON SEWERS.

The committee, appointed by the City Council, respectfully submit the following report, covering the cost and construction of sewers in the city of Franklin, for the year of 1909:

The committee have finished the layout, adopted by the Council of 1908. In the table below will be found the streets, length of sewer constructed, size of pipe, and number of manholes. Credit will also be noted for sewer permits, and for labor and material used in making house connections. Also stock on hand at the close of the year. The total number of feet laid by the city this year is 4,341. Eighteen manholes have been constructed. The total cost, including the amount for labor and material in making house connections, was \$8,484.06.

The work has been under the direction of R. H. Sumner, engineer. The committee have employed local help. We feel sure that the construction of sewers, as carried out under the direction of the City Council for the past two years, will be a constantly increasing benefit to the

city.

Sewers Constructed in 1909.

FIRE DEPARTMENT.

ENGINEERS' REPORT.

To His Honor the Mayor, and Gentlemen of the Council:

The following report for the year 1909 is hereby submitted.

The manual force of the fire department consists of a chief engineer and four assistant engineers; hose company No. 1, ten men, Edwin A. Flanders, captain; Daniel Webster steamer and hose company, 15 men, John McGloughlin, captain; and hook and ladder company, No. 1, Amedos Rousseau, captain.

Location of Apparatus.

Hose Company No. 1, South Main Street.

One one-horse hose wagon equipped with swinging harness, two pony extinguishers with extra charges, hose pipes, axes, gates, relief valve, ladder straps, wrenches, spanners, coats, boots and belts.

One one-horse sled.

One 30-foot ladder and one 25-foot ladder.

1000 feet 21-2 inch rubber lined hose.

Central Station.

One Amoskeag steam fire engine in good working condition.

One two-horse Seagrave hook and ladder truck in good condition, equipped with swinging harness, two pony extinguishers with extra charges, wire cutter, tin roof cutter, ropes, axes, etc., coats and boots.

One set runners for hook and ladder truck.

One one-horse hose wagon with swinging harness, two pony extinguishers with extra charges, hose pipe, axes, gates, relief valve, ladder straps, spanners, wrenches, axes, hose jacket, coats, boots and belts.

One one-horse sled.

1900 feet 2 1-2 inch rubber lined hose.

Hose 3, Central Street, opposite Paper Mill B.

One hand reel, with pipes, wrenches, spanners and 400 feet 2 1-2 inch rubber lined hose.

Hose 4, Head of Elm Avenue.

One hand reel, with pipes, axes, wrenches, spanners and 400 feet 2 1-2 inch rubber lined hose.

One two-wheeled truck equipped with one 21-foot roof ladder; one 28-foot, one 20-foot and 15-foot ladder.

Hose 5, Pearl Street near Park Street.

One hand reel with pipes, wrenches, spanners and 400 feet 2 1-2 inch rubber lined hose.

Hose 6, Sturtevant Street.

One hand reel with pipes, wrenches, spanners and 400 feet 2 1-2 inch rubber lined hose.

A hand engine in good condition is stored in the Daniell barn and a 55-foot extension ladder at the city stable.

Fire Record, 1909.

January 7. Still alarm chimney fire, residence of Mrs. Hannah Pennock, 38 Pemigewasset street. No loss.

January 8. Still alarm chimney fire, residence of Horace Carpenter, 155 North Main street. No loss.

January S. Still alarm, chimney fire, residence owned by Mrs. Clement, 29 West Bow street. No loss.

January 8. Still alarm, chimney fire, residence owned by Shepard Brothers, on Willow Hill. No loss.

January 9. Still alarm, chimney fire, residence of Mrs. John Sanborn, owned by David Gilchrist. No loss.

January 10. Box 22, fire at the residence of Mrs. Mary Dee, 141 Franklin street; insurance on building, \$2500; amount paid, \$11. Cause, defective chimney. Used pony extinguishers.

January 12. Box 25, fire in the three story business block and one-story annex, 337-343 Central street, owned by Edward A. Brockway. The second and third story was vacant, store in block occupied by Martin Cunningham, undertaker and dealer in furniture, and annex was occupied by Mitchell Haddad, dealer in dry goods and clothing. Building was insured for \$4700; amount paid. \$4026.50. Mr. Cunningham carried no insurance; loss, \$1800. Amount of insurance carried by Mr. Haddad \$6500; insurance paid, \$3500.

There being evidence that the fire was of incendiary origin, an investigation was started and a hearing held. but evidence was lacking to carry the case farther.

January 12. Box 34, unnecessary alarm, chimney fire, residence of Mrs. Emily Hunt, 625 Central street. No

January 14. Still alarm, chimney fire, residence of David P. Hatch, 161 South Main street. No loss.

January 18. Still alarm, chimney fire, residence owned by Mrs. Emeroy R. Morrison, 144 West Bow street. No loss.

February 1. Box 14, fire at residence of Joseph Beaupre, 215 North Main street, owned by Joseph Brown estate. Insurance on building, \$1700; amount paid, \$35. insurance by Mr. Beaupre on contents, \$500; amount paid, \$50. Probable cause of fire, child and match.

February 1. Still alarm, chimney fire, residence of

Fred F. Long, 257 North Main street. No loss.

February 1. Still alarm chimney fire, building occupied by George B. Morrison, grocer, 159 Central street. No loss.

February 9. Still alarm, chimney fire, residence owned

by Mrs. Adeline P. Hopkins. No loss.

February 25. Still alarm, chimney fire, residence of

Armedos Rousseau, 331 East Bow street. No loss.

February 25. Still alarm, chimney fire, residence of Edward Morrison, Webster street, owned by Mrs. Carrie Baxter. No loss.

February 28. Still alarm, chimney fire, residence of

Jason Kidder, 102 Pine street. No loss.

March 9. Box 23, fire at residence of Mrs. Abbie Mc-Donnell, 18 West Bow street. Fire started in the stable from unknown cause. Stable rented to Theodore Howe, whose horse was suffocated. Loss to Mr. Howe, \$150; no insurance. Insurance on building, \$3000; paid, \$542.75. Insurance on furniture, \$300; paid, \$52.

March 22. Still alarm, chimney fire, residence owned

by Mr. Kelley, 17 Elkins street. No loss.

March 28. Still alarm, chimney fire, business block, 424-430 Central street, owned by Mrs. Arabella Kendrick. No loss.

April 7. Still alarm, chimney fire, residence of Arthur Lefave. N. loss.

April 16. Still alarm, chimney fire, residence owned by Alvah W. Sulloway, Elkins street. No loss.

April 2. Still alarm, chimney fire, residence of Mace C. Heath. No loss.

April 20. Brush call, fire on land of Frank H. Marsh. April 28. Brush fire on Crosby land, Salisbury street. May 7. Box 14, fire at the wood-working shop owned by E. Wilbur French. Insurance, \$1000. No loss.

May 9. Brush fire, on land of Warren F. Daniell, Sand

Farm. No loss.

May 11. Box 34, unnecessary alarm, chimney fire, residence of Charles Welters, 669 Central street. No loss.

May 16. Box 14, fire at Lawndale, unoccupied dwelling owned by Sherman Ring. Insured for \$300; loss,

total. Sent a detachment from the department.

May 16. Box 25, fire at the lunch and pool room owned by Mrs. I. Bellmore, occupied by William Lynch. Total insurance, \$300; amount paid, \$300. Cause, gasolene stove.

May 12. Brush fire on land of B. M. Prescott.

May 24. Brush call, fire on land of George Brooks.

May 26. Brush call, fire on land of F. M. Edmunds.

June 2. Brush call, fire on land of George Dimond. June 4. Brush call, fire on land of F. M. Edmunds.

June 15. Brush call, fire on land of Charles Palmer. June 27. Still alarm, grass fire on Railroad banking

off Webster street. No loss. June 28. Still alarm, chimney fire at Nesmith school. No loss.

June 29. Brush call, fire on land of Miss Mary Scribner. July 4. Box 25, fire in shed off Canal street. No loss.

July 5. Brush call, fire on land of Mrs. Arabella R.

Kenrick.

July 5. Still alarm, fire in shed owned by Will Gordon. No loss.

July 5. Still alarm, grass fire on land owned by the

Boston & Maine R. R. No loss.

July 15. Box 14, followed by 5 strokes (steamer call), fire in large pile of poplar wood owned by The Pemigewassett Power Company. Loss 1853 13-32 cords wood valued at \$10,193.73; no insurance. Cause unknown. Store house owned by same company and a quantity of baled excelsior was totally destroyed. Insurance upon store house, \$1500; value, \$1746.19. Value of excelsior, \$960.35; insured for \$500.

Dwelling owned by Mrs. Clinton Blake, insured for \$2500; insurance paid, \$10. Contents insured for \$1000;

paid, \$10. Cause, sparks from other fire.

Dwelling owned by Miss Emma Howe insured for \$1200; amount paid, \$25. Cause, sparks from other fire. July 31. Steamer call for fire at the residence of Horace Locke, Webster Place. Insurance on house, \$1300; paid, \$1200. Insurance on contents, \$500; amount paid, \$256. Cause upset lamp.

August 18. Still alarm, chimney fire, residence of Mrs.

Clara E. Johnson, 30 Webster street. No loss.

August 23. Brush call, fire on land of Palmer Brothers.

August 24. Brush call, fire on land of Palmer Brothers.

August 27. Still alarm, chimney fire, residence of John

Heath. No loss.

September 3. Brush call, fire out of district, residence of Arthur E. Shaw, on Salisbury road. Loss on building and contents, \$350; no insurance.

September 29. Still alarm, chimney fire, residence

owned by Mrs. Clement. No loss.

October 8. Still alarm, chimney fire, residence No. 85,

Franklin street. No loss.

October 9. Still alarm, residence of Mrs. Renfrew and owned by Mrs. Lucy Odell. Insurance on building, \$1000; amount paid, \$10. Insurance on contents, \$300; paid, \$40.

October 10. Still alarm, chimney, fire, Dr. Grace

house. No loss.

October 29. Steamer call, for chimney fire at Webster Place, residence of Frank L. Knowlton (Orphans' Home). No loss.

October 30. Still alarm, chimney fire, residence Frank

Putney, South Main street. No loss.

October 30. Still alarm, chimney fire, residence of Abraham Delisle, 17 Sanborn street. No loss.

November 5. Still alarm, chimney fire, residence of Mrs. McKenry, 144 Franklin street. No loss.

November 12. Still alarm, chimney fire, residence of

Ernest Laplante. No loss.

November 24. Box 25, unnecessary alarm, chimney fire, residence of Mrs. Cating, 73 Elkins street. No loss.

November 26. Still alarm, chimney fire, residence of

Ieremiah Nevins, 14 Russell street. No loss.

December 10. Still alarm, chimney fire, Christian

parsonage. No loss.

December 11. Still alarm, chimney fire, Mitchell block. No loss.

December 20. Still alarm, chimney fire, Shepard block, Memorial street. No loss.

December 26. Still alarm, chimney fire, residence of

James Keniston, Webster street.

Pony extinguishers, to be used by any person, for fire purposes in the vicinity of the places of keeping, are stationed at the following places: City hall, 2; Clark & Knowlton's, 2; Franklin passenger station, 1; and Mace C. Heath's stable, 1.

During the year the hose house, formerly stationed off Pine street, has been moved to Sturtevant street, near the residence of Mrs. Crosby, and the hand reel from Hose 1 station has been equipped and placed therein.

A new box, No. 311, has been installed at the corner of Beeech street and Highland avenue, and arrangements made for the steamer to respond on first alarm, on account of low pressure on the water mains in this vicinity.

Recommendations.

We recommend that three boxes be added to the fire alarm system; one near the residence of Reuben Morrill, Willow Hill, and one near the Bristol R. R. crossing, North Main street, to be three number boxes for steamer call, and one two number box on East Bow street near the Kidder Machine shop.

We recommend the purchase of 500 feet Paragon hose, swinging harness for the steamer, hats for the firemen,

a life net and deluge set.

Harry E. Colby, Chief, George F. Garneau, John Cunningham, James W. Huntoon, Dana F. Fellows, Clerk, Board of Engineers.

Regulations of the Franklin Fire Department.

Adopted Dec 20, 1909.

Section 1. The fire department, of the City of Franklin, shall be composed of a chief engineer, first assistant engineer, second assistant engineer, third assistant engineer, fourth assistant engineer and a superintendent of fire alarm, who shall each be appointed by the city council; one steamer and hose company to consist of fifteen men, one hose company to consist of fen men and one hook and ladder company to consist of fifteen men.

Section 2. The chief engineer and four assistant engineers shall constitute a board of engineers and shall

exercise the power of firewards.

Section 3. The chief engineer and each assistant engineer shall hold his office and perform his duties until

his successor takes the oath of office.

Section 4. The City Council, for cause, after a hearing may remove from office the chief engineer or any assistant engineer.

Chief Engineer.

Section 5. The chief engineer shall have sole command over all persons present at fires whether members of the fire department or not.

Article 1. He shall direct all proper measures for extinguishing fires, protecting property, preserving order at fires, and enforcing laws, ordinances and regulations

regarding fires.

Article 2. He shall have charge of and examine into the condition of all fire apparatus, fire alarm system, houses and all fire department property and shall cause needed repairs to be made under the direction of the committee on fire department of the City Council.

Article 3. He shall certify all pay rolls and bills against the department and shall be responsible for the care of all property connected with the fire department.

Article 4. In the absence of the chief engineer the next engineer in rank, who may be present, shall have the power and perform the duties of the chief engineer.

Board of Engineers.

Section 6. The board of engineers shall inspect and make themselves familiar with all shops, factories, hotels,

tenement houses, public buildings, halls, churches and schoolhouses once a year and study the location of all hydrants and generally inform themselves in all matters pertaining to their duties.

Article 1. They shall have control of all persons appointed to serve in any company of the fire department and shall have power to direct and control the

labor of all persons present at a fire.

Article 2. They may from time to time make and enforce such regulations for the government of the depart-

ment as they may deem proper.

Article 3. They may establish such regulations respecting public safety, kindling, guarding, safe-keeping, prevention, and extinguishment of fires, and for the removal of combustibles from any place, and the keeping or storing of explosives, as they think expedient, which shall be signed by a major part of them, approved by the Council and recorded by the city clerk, and attested copies posted in two or more public places in the city thirty days before they shall take effect.

(a) Penalties not exceeding ten dollars for each offense may be prescribed for breach of such regulations and such regulations shall remain in force until altered

or annulled.

Article 4. They shall examine the qualifications and fitness of all applicants for membership in the department and no person, whose application has not been approved by a majority of the board of engineers shall be-

come a member of any company.

Article 5. At the first meeting in each year, after the qualification of the engineers, they shall proceed to elect, by majority vote, a clerk of the board of engineers, a captain, a lieutenant, and a clerk for each company and an engineer, assistant engineer and stoker of the steamer each of whom shall hold office until his successor is elected.

Article 6. Any member of any company may be dismissed from the department or from office in a company

by two-thirds vote of the board present.

Article 7. They shall in conjunction with the annual report of the chief engineer, make recommendations as

to the needs of the department.

Article 8. Every engineer shall cause any fire deemed by him to be dangerous, in any street or elsewhere, to be extinguished or removed.

Superintendent of Fire Alarm.

Section 7. The fire alarm system shall be under the control of the chief engineer, with direct supervision by a superintendent of fire alarm who shall be elected by the Council.

Committee on Fire Department.

Section 8. The committee on fire department of the City Council, with the approval of the chief engineer and subject to direction by the Council, shall purchase all supplies in connection with the department.

Article 1. They shall direct all repairs of the houses,

fire alarm system, and fire apparatus.

Article 2. They in conjunction with the board of engineers, shall hold meetings on the last Wednesday of each month.

BOARD OF HEALTH.

To the Honorable Mayor and Council of the City of Franklin:

The Board of Health respectfully submit the following report for the year 1909:—

The number of contagious diseases reported, for which disinfecting was necessary, is eighteen, a decrease of four from last year. Of these cases the mortality is one death from fifteen cases of diphtheria, and one death from three cases of scarlet fever. Eight deaths were re-

ported from tuberculosis.

At the beginning of the year there was an epidemic of measles of one hundred and thirty-one cases, resulting in only three deaths. Four cases of typhoid fever were reported with no deaths. Two of these cases originated from drinking well water, polluted with sewerage, and we were unable to ascertain definitely the cause of the other two.

The total number of deaths during the entire year is 104. The number of bodies brought to the city from other places, for which burial permits were issued, is 32.

The completion of the sewer system in wards two and three is a source of great satisfaction to the members of this board,, from a sanitary standpoint, enabling us to eliminate what was heretofore a serious menace to the health of the community, viz., sink spouts, privies, etc.

We strongly urge and recommend that this good work be continued, and at an early date more sewer be constructed in the vicinity of Chadwick and Kidder's lumber yard, and also Main street, of ward one, the sewer system in these particular localities being specially deficient.

Owing to the special war against tuberculosis at the present time, we further recommend that the law in regard to expectorating on sidewalks and public places

be more rigidly enforced.

The clerical duties of this board have been promptly

and efficiently attended to.

In concluding this report we wish to extend our thanks to the Honorable Mayor and Councilmen for their hearty support given us in the performance of our duties.

> W. E. Smith, Frank H. Daniell, L. W. Phillips.

G. O. Thompson, Treasurer.

CITY SOLICITOR'S REPORT.

To the Honorable Mayor and Council of the City of Franklin:

Gentlemen:—At the beginning of the year there was pending in the Superior Court a suit by George Gignac and others, against the city claiming damages in the sum of two thousand dollars.

Depositions have been taken in this case, which tend to show a very small liability, if any, on the part of the city, and the case is now in order for trial at the April

term of court.

The bill in equity filed in the Superior Court praying for a discontinuance of the Slide Road, so-called, has been continued as it did not seem advisable to have a hearing

in this matter until a later date.

A petition by Edward G. Leach, Administrator, has been filed in the Superior Court against the city praying for leave to file notice with the city on account of the drowning of a child in the Winnepesaukee river near West Bow street, but no hearing has been had on this petition for the reason that the plaintiff states that his witnesses are in Canada. This matter can undoubtedly be settled for a very small sum if it is deemed advisable to do so, but in my opinion it is doubtful if any liability exists on the part of the city.

James O'Donnell of Manchester brought suit against the city claiming damages in the sum of five thousand dollars, for personal injuries alleged to have been received by him while employed in the construction of the reservoir built by the water commissioners this year.

The deposition of the plaintiff was taken by me at Manchester, and in my opinion it is very doubtful if any

liability exists on the part of the city.

This case, if tried, will be in order for hearing at the January term of the Superior Court for Hillsborough

County.

By direction of the Mayor, I have brought suit in behalf of the city against Percy Milne on account of unpaid license fee due the city for maintaining a moving picture show, said fee not having been paid in advance as required by the city ordinance.

The writ in this action was entered at the October term of the Superior Court for Merrimack County, and the case continued for the reason that other suits had been brought against the defendant prior to this suit, and the property under attachment not having been converted into cash.

Eva L. Greeley made claim against the city for injuries to her horse on account of an alleged defect in the highway on East Bow street, and I have filed my report on this claim, recommending that the same be disallowed.

Iames H. Ross of Willimantic, Conn., made claim against the city for injuries to his automobile, alleging defect on the Heath Road, and I have filed my report on this claim, recommending that same be disallowed.

The claim of Lester C. Maxfield for damages on account of alleged breach of contract on the part of the city, has been reported back to the council for its consideration, the same being purely a question of fact.

During the year many complaints and warrants have been issued by me at the request of the Mayor, City Marshal and Probation Officer on account of various violations of the law

Deeds have been drawn at the request of the Park Commissioners on account of land sold by them at Webster Park, two bills were drawn by me and passed by the Legislature, relative to the boundary lines between Northfield and Franklin, and closing Webster Lake to winter fishing.

As the Council is aware much time has been devoted by me relative to the Merrimack Valley Road, and it is to be regretted by all that with an earnest desire on the part of the city to complete this road that it has not been done, and through no fault of the city.

Many legal questions have arisen relative to this matter due to various interests involved, all of which

have required time for careful consideration.

It is expected that the question of damages will soon be adjusted, so that early in the spring work can be commenced under the direction of the state engineer, and the road opened to the public by the first of the summer.

THOMAS F. CLIFFORD,

City Solicitor.

POLLS, VALUATION, AND TAXES ASSESSED.

The number of polls, and the taxes assessed on the real and personal estate, in the city of Franklin since 1895:

Year	Polls	Valuation	Rate	Tax
1895	1231	\$2,415,286 00	\$1 70	\$41,059 00

Water Rates.

All customers are supplied through meters. The minimum charge is six dollars per year, which entitles the consumer to 2,000 cubic feet during the year. Rentals are collected quarterly. For the first 1,000 feet or less in each quarter the charge is 30 cents per 100; for the excess over 1,000 feet used each quarter, 20 cents per hundred feet is charged.

Upon all quarterly bills exceeding \$12.50, a discount of

50 per cent. of the excess over \$12.50 is made.

No charge is made for private hydrants or for automatic sprinkler service.

Improvements.

Early in the year the commissioners presented to the city council the plans outlined in the reports for 1907 and 1908 for the removal of the swampy material about the wells near the Pemigewasset river and the construction of a large collecting well. The plans were approved by the council and an appropriation of \$10,000 voted for the

purpose.

Specifications for a well 40 feet in diameter and 20 feet deep were drawn by Mr. F. L. Fuller and submitted to contractors who offered to construct such a well for \$9,500. The work of clearing the ground was then in progress and it was decided to build the well in the same way, by the day: The Superintendent, Mr. Wallace, has been in general charge of the work, with Mr. James C. Nowell, foreman, while the commissioners have given personal attention to the construction.. All vegetable matter was removed from nearly an acre of ground to a depth varying from one to ten feet. It was difficult to separate the expense of this work from the well construction when both were going on at once. Up to the time the well was commenced, \$1,934.74 was expended on this part of the work. The expense of the subsequent construction, including the well, settling basin, filter and grading to fill the low ground between the wells and river, and also including interest on the money advanced during construction was, \$9,636.16. character of the soil encountered in digging the well rendered it advisable to go deeper than was first planned and the well built is 29 1-2 feet deep from the center of the roof. The pit from which the gravel for the work was taken was utilized for a settling basin. The sides and bottom of the depression north of the well from which the muck was removed were of clay practically impervious to water and formed a natural bed for a filter. Tile pipe with open joints was laid upon the bottom. The whole was then covered with one foot of sifted gravel upon which was placed from 3 1-2 to 5 feet of fine sand. The tile pipe enters a manhole, connecting with the large well, in which is a gate by which the flow of water through the filter is controlled. The river water used is first pumped into the settling basin from which it is allowed to flow continuously upon the filter in sufficient quantity to keep the sand covered. After passing down through the sand the water enters

the large well through the gate above mentioned supplementing the natural supply furnished by the well. The quantity so furnished is ample. The well holds nearly 10,000 gallons per foot in depth. The water in the well as the pumps are now operated is 25 feet deep in the morning. The pumping during the day lowers the level less than four feet. Analysis by the State Board of Health finds the water of satisfactory quality. At the present time at the close of an extremely dry season, about one-half of the water supplied is filtered river water. In ordinary seasons very much less and for a large part of most years none at all will be used. But if needed an inexhaustible supply of good water is ready.

The work planned was all completed with the exception of seeding down the new ground graded. Most of the expenditure was for labor and except a comparatively small amount for pipe and gates and special castings, the whole amount expended was paid out in the city. Of the appropriation of \$10,000, \$9,000 was drawn. Of this \$500 has been returned, leaving the sum advanced by the city \$8,500. The appropriation was made with the understanding that the same with interest should be paid by the water works. Interest to January 1, 1910, has been

paid. The principal can soon be refunded.

Frederick H. Daniell, Frank N. Parsons, George D. Mowe, Thomas F. Clifford, Alvah W. Sulloway, John W. Staples,

Commissioners.

December 31, 1909.

FRANKLIN PUBLIC LIBRARY.

BOARD OF TRUSTEES' REPORT.

To the Mayor and Members of the City Council of Franklin:

I take pleasure in behalf of the Board of Trustees of the Franklin Public Library in submitting herewith the reports of the Treasurer of the Board of Trustees, and the Librarian.

The good work that the Library is doing and its present needs are fully covered by these reports, and I trust they will receive your careful consideration.

Respectfully submitted,

W. F. DUFFY.

Board of Trustees, Franklin Public Library.

LIBRARIAN'S REPORT.

To the Trustees of the Public Library:

The records of the Library during 1909 show that in this year, as in the two previous, the largest circulation was in March. The largest daily circulation was on March 20 when 425 books were sent out for home use. The smallest daily circulation was on April 22, only 15 books being charged on that date.

The number of borrower's cards in use on January 1, 1910, was 925; 417 new names have been added, making the total registration 3,028. We have had many transient visitors who have not received formal registration; but who have gladly availed themselves of the privilege of borrowing books for their brief stay.

It is a great disappointment to the reading public and to the Librarian, as well, that the printed catalogue, so long in preparation, is not forthcoming at the beginning of the year. Many borrowers feel that they cannot spare the time for an exhaustive search of the card-catalogue; many others cannot come to the Library at all, and are forced to depend upon the selection of friends. For such patrons a printed catalogue would be of the greatest convenience.

The third year of the Library's usefulness has not been signalized by any large gift of books, only 27 being given by citizens. The books added by purchase are 624, bringing the total number of accessions to 7374. Fifteen

books have been withdrawn as worn out.

The New Hampshire Library Association held a meeting here on October 14, which was attended by thirty-five librarians from different parts of the state.

As will be seen from a comparison of the records of previous years, there has been a marked falling off in the circulation of children's literature. This is doubtless due to the fact that very few books have been purchased for the Children's Room for the last two years, on account of the overcrowded condition of the shelves. During 1908, 87 new titles were added, and only 53 during 1909. This number does not include all the books purchased for that room, for there are many duplicates which we find indispensable. The problem of providing more shelf room is one that will have to be solved very soon. Many children have read all the books in the Children's Room twice over

TREASURER'S REPORT.

To the Trustees of the Franklin Public Library:

Gentlemen: I hand you herewith my report of receipts and expenditures for the year ending Dec. 31, 1909. You will notice that the expense for maintenance has exceeded by \$3.16 the amount of the annual appropriation for that purpose. A small surplus remaining from the two previous years will more than cover this excess which is in part due to extra labor required in compiling a catalogue. It is, however, an indication that thepresent appropriation is only barely sufficient to cover the immediate running expenses of the library.

SUPERINTENDENT'S REPORT.

To the Board of Education:

Gentlemen:—I present to you herewith my third annual report, the ninth in this series of reports. As heretofore, I shall discuss those matters which are of immediate concern and deserving of our earliest attention.

For the convenience of those who may read this report I shall so index it that reference may be easily made to

the different topics.

The Health of the Child.

1. The first step in public school education.

2. Training teachers to detect signs of ill-health.

3. Medical inspection.

1. In my opinion the first and most important step in our educational process has been generally neglected. I refer to the physical welfare of school children. While it is true that exceptional minds have been housed in weak and emaciated adult bodies, it is rarely that a child makes safe mental progress when hampered by a weak body.

Sense-training is the key-note of the present era of educational development but sense-training is a mockery unless preceded by sense-testing. More than one child in Franklin is suffering from head-ache and nervousness due to defects of vision. Many are retarded in their school work because deafness caused by adenoids has made them appear to the teacher to be stupid. Indigestion due to poor teeth has been the cause of general ill-health in more children than we suspect. A sick child cannot work. Our first duty to the child, then, is to see that he is in physical condition to work and to see that he is in surroundings favorable for efficient work.

2. The teachers need to be more aware of the importance of physical conditions. At present our normal schools place too little stress upon this phase of the teacher's training. Until they are thus trained, I believe they should be given the benefit of instruction under a medical expert and be instructed to put his teach-

ing into practice in their school-rooms.

3. It is, however, futile to expect that the teacher can, unaided, do more than a superficial work in this line. They should have, as advisers, competent physicians to make regular inspection of the children and take in charge any cases which require special treatment. No financial consideration should stand in the way of such a policy, which, in fact, would be an economy in the matter of money as well as of efficiency. It costs on an average \$25 a year to send a child from the kindergarten through the High school. This year there are 50 children repeating their work in the several grades at an expense to the city of \$1,275. Now let us say that a half or even a fourth of these children are retarded because of defective eyesight, adenoids or poor teeth, all of which can be remedied, is not the saving of \$600 or even \$300 a wise economy? An appropriation of \$300 would be ample for medical inspection and also cover the expenses of a trained nurse who could "follow up" cases under treatment.

Some Much-needed Changes.

1. Ventilation of High School Building.

2. Electric Light Equipment.

3. Adjustable Furniture.

1. Recent legislation of the General Court which reguires us to expend between \$300 and \$400 for a fire escape on the High school building should have gone a step farther and required that every school-building large or small should be equipped with such a system of ventilation that the occupants might have the thirty cubic feet of air per minute to which they are entitled. A good many years before men knew indirect radiation and anything about problems. Dame Nature passed a few inexorable laws governing the health of mankind. To every law was affixed a penalty. Man must have an abundance of AIR. Man must have an abundance of LIGHT. The penalty for breaking these simple laws is death, not sudden and violent, and not necessarily the death of the offending member; but premature death to the offending member and the shortening of the life processes of his succeeding generations. Our High school building is a striking example of the violation of

both of these simple laws. How far the penalty has been or is being exacted is difficult to estimate, but the present discomfort of the people in the building calls for a rem-

edy of existing conditions.

In the first place the volume of heat sent to this building is enormous. The steam guages, even on a warm day in winter with outside temperature above freezing, have registered eighteen pounds pressure. If the steam is turned off in the school-room, all circulation stops. There is no means of reducing this pressure except at the heating-plant. The janitor is obliged to keep up pressure there because he must heat the opera house several days in the week. If some of this surplus heat could be sent through a coil of pipe to induce an indirect radiation, our comfort would be assured.

I am told by an expert steam-fitter that such a system

could be put in for less than \$1,000.

I beg to emphasize this as our most pressing need in the line of repairs and a need which we cannot afford to

ignore or put off till a more convenient season.

2. Several of the rooms in the High school building are insufficiently equipped with electric lights. As the window area in these rooms is only one-seventh of the floor area when it should be one-fourth, it may be said that these rooms are only half-lighted even on a fair day. On dark days and especially in the afternoon the lighting

is wholly inadequate.

3. It is a noteworthy fact that we have not a desk nor a seat in Franklin that can be adjusted to fit the child. The consequences are striking to one who is constantly visiting the schools and seeing the children at work. It is not remarkable that children assume reclining attitudes in seats whose lines correspond more closely to the pattern of an easy chair than that of a good, sensible, straight-backed chair. Nor is it remarkable that Principal Swett finds it necessary to give vigorous physical exercises to his students when their bodies have been warped out of shape for eight years by school furniture that was ill-conceived in the first place and out of date when their fathers used it.

I would recommend that the Board engage in a policy whereby at least one room may be fitted up each year with adjustable furniture. The cost per room allowing for exchange rates and transportation should not exceed

\$150.

Manual Training.

. 1. The work already accomplished.

Our limitations.

Last year I reported at some length the development of manual training accomplished by a class of grammar school boys. During the winter and spring terms these boys devoted themselves, in the main, to designing and making models for several pieces of playground apparatus. Before the end of the spring term three see-saws and a 12 foot swing standard were erected on the Falls play-ground. These have been in constant use for about four months, and while some defects of workmanship were brought to light they have proved safe and durable, giving much pleasure to the smaller children who have used them constantly.

My object in taking up the work in the way that we did was to show what could be done with limited means and to demonstrate locally the value of this phase of educational work. From several reliable sources I have been convinced of a disposition on the part of the people to support work of this sort when the financial conditions are more favorable. As to the value of the work to the boys who kept it up through the year I have little question but that they were benefitted by the experience. I regret that thus far this year I have nothing to report regarding work accomplished. I shall speak of this under the next head.

2. Our limitations. While the work up to date has been done at very small expense to the city it is not to be expected that it could be continued indefinitely on a "one cent capital." Lack of money is our first limitation. Under existing general financial conditions in the city it is not to be expected that money could be appropriated for this purpose at the present time. I trust that this need may be kept in mind and met when the time is more

favorable.

Our second limitation is the lack of an instructor. There are so many details in the work of a superintendent that I have not felt justified in giving even one day to the teaching of this department, not to mention the fact that doing this would necessitate a great deal of planning and preparation which must be done in the time otherwise devoted to general school work.

Aside from these two limitations we are very favorably situated for the beginning of this work, as we have ample space for extensive development; but until these limitations can be compassed, no advance is possible.

The Home and The School.

Since my last report we have had eight parents' meetings for the purpose of showing the regular school-room work and for the discussion of topics of general interest to the parents and citizens. At the four meetings held during the fall term, local physicians spoke on the topic, "The Health of School Children." We are indebted to Doctors Drake, Staples and Woodman for their practical suggestions on this subject. I hope their advocacy of medical inspection may set on foot a demand for the services of at least one school physician to carry on the work recommended in this report.

The number of visits of parents and citizens during the year is 1652. With such interest on the part of the home it is easy to account for the helpful attitude of the people in general toward the teachers and the work of the school.

The School-room Work.

1. Penmanship.

2. Training for citizenship.

3. Adapting the work to the nature of the child.

1. During the present school year the teaching of penmanship has been prosecuted vigorously and intelligently by the teachers. For a part of the summer vacation they studied the manual of penmanship upon which our system is based, and the majority of them practised the forearm movement. The results of their faithful preparation have exceeded my expectation. An inspection of the work of the children will not reveal as yet a perfected letter form, but it will show that the children are acquiring habits of muscular control that will, in course of time, make them fluent and skilful penmen.

2. We have added to our list this year two valuable books—Hill's "The Junior Citizen" and Dunn's "The Community and The Citizen." The first of these has been used as a supplementary reader and as a book for study in the sixth grade. The second has been used in grade eight and is now used in grades seven and eight. The books treat of the practical duties of citizenship. A stimulating part of this study is the "field work" or observation work. Thus far both schools have visited

the city elections with their teachers and have conducted elections in their schools after the most approved fashion. A part of one class attended the inauguration of the city government. The Nesmith class are saving money to take a trip to the Merrimack County Farm. The practice of interviewing local business and professional men has resulted in much profit.

Miss Clara Rowell gave an interesting account of the "Early History of Franklin" to the members of the Falls and Nesmith grammar grades, which greatly stimulated their study of the city. In connection with the physiology which is more or less closely associated with civics study, Dr. Sargent spoke to the Nesmith eighth grade on

the structure and hygiene of the teeth.

3. Adapting the work to the nature of the child. Since the birth of the American commonwealth the almighty dollar has been the regulator of almost every matter pertaining to the public school. Within recent years, however, the fact has been gaining prominence that the child is more important than the dollar and consequently school policies are beginning to be regulated by the needs of the child. This is one of the promising signs on the horizon of educational progress and one that bodes well for the future of our civilization. There are certain adaptions in the school work that need to be made in view of our increasing knowledge of the nature of the child.

Arithmetic. There is probably no subject that has so litle in common with the real nature of the child as arithmetic, as that subject has been for many years taught. It is a demonstrated fact that up to at least eight years of age the child has no sympathy for quantitative values, and yet we foist upon him meaningless "table," " sums," and rules. It is equally true that the child of this age has a warm sympathy for qualitative values as is shown by his desire to feel of objects, choose bright colors and taste everything within range. While we have recognized these characteristics to a certain extent, I believe we should recognize them more, and to that end I contemplate a further simplification of our program in primary arithmetic. The advanced work has already been simplified by taking out cube root, partial payments and the metric system.

b) Penmanship. I have come to the conclusion that asking a six year old child to hold a pencil properly and

"carve out letters" is almost as absurd as requiring pupils to "toe a mark" in reading class. So much effort is spent in watching the toes that the reading suffers. So much effort is spent in detail of pencil-holding that writing suffers. Writing is so largely a habit of the muscles that it is much more reasonable to train those muscles by such larger movements as paper cutting, folding, coloring, etc., before attempting the fine and unattainable script forms.

I am inclined to favor such adaptations in our work, especially in grades one and two, that the children may do a minimum of pencil work and devote much more time to oral language, observation and manual occupations.

c) In general. What is the most we can do to meet the child's needs? Above and beyond all the mere information that the school can give, there are certain invaluable possessions to be gained. If, when the young man leaves school, he has implanted within him the seeds for a broad range of sympathy with his fellow men; if he has acquired habits of study and application, of economy both of time, effort and resources; if he has learned self-reliance, belief in his fellow-men and love of country; if the spirit of his life is "to do justly and to love mercy," then has the school understood and met his need. The call today is not training for the cloister and hermitage, but for the market place. The teachers, still retaining all the ideals of scholarship, must be in touch with the real life and activities of the world. Book learning and learning from books must be supplemented by keen power of observation that studies men and events first hand, draws inferences and forms judgments independent of "what the book says." The community can afford to tax itself for this kind of training although the rate of interest on their investment may seem small and the returns somewhat remote.

Conclusion.

In closing this report it is fitting that I express the appreciation of the teachers for the helpful co-operation of Miss Mary A. Proctor, who resigned from the Board of Education last year, and Judge O. A. Towne, who resigned during the present year. These two citizens have served respectively fourteen and twenty-three years. Their efforts for better schools, the former as a well-trained and constant school visitor, the latter as an efficient business man, have had a value that the public too little appreciate.

Under the administration of the present Board, we, the teachers look forward to a continuance of those general conditions that make our work for the city a pleasure and a satisfaction.

Respectfully submitted,

W. H. SLAYTON.

HIGH SCHOOL REPORT.

To the Board of Education:

My fifth report is herewith respectfully submitted:

Numbers.

The school is now the largest that it has ever been. This last fall term there were fifty-nine pupils enrolled in the entering class. The rest of the school has been as large as at any time, and the total registration of the school has been one hundred fifty-eight. The last three years a relatively large number of boys have entered the high school, and it is interesting to note that the total number includes seventy-two boys and eighty-six girls.

Changes.

The size of the school has made it necessary to increase the teaching force. Last year we had an additional teacher for part of the time. This year the position has been filled for the full time. There are now five assistant teachers. Of these five, four taught in the school last year. It is much to be hoped that it will be possible to retain year after year those teachers that are serviceable for the school. The salaries should be sufficient to keep their services, as the work can not be indefinitely improved, when it is continually taken up by new teachers.

Several new studies have been introduced. To meet the needs of some students trigonometry and advanced

algebra are taught this year.

Instead of geology, parts of which can be studied in connection with physical geography, medieval history is now taught. This makes our course in history a well rounded one. We have now the following courses in his-

tory: English, Greek, Roman, medieval, and American. In place of astronomy a course in economics has been introduced. At a time when industrial conditions are the object of serious thought throughout the country, it is gratifying to be able to find a place for the teaching of the principles that underlie modern industry. It is and will continue to be a very important study. In my judgment all high schools should include the subject in their program. We have at present the following business courses: Bookkeeping, commercial arithmetic, commergeography, commercial law, and elementary economics. It will be noticed that typewriting and stenography are not included in this list, although they are frequently taught in schools no larger than ours. They are of little value to any one who is not to make a direct use of them after leaving school. If introduced, they had better come late in the series of business courses, rather than early to the exclusion of other studies of wider value.

Other subjects, ordinarily taught in high schols, have, of course, direct bearing on industrial occupations. Mathematics is of great importance in many kinds of positions. Physics and chemistry, although now taught too abstractly, possibly, have a wide industrial application. Other natural sciences that we teach, and mechanical drawing, to say nothing of history, and the English

branches, have also an industrial significance.

At the same time with the growth of the school and the introduction of new branches it has been possible to retain the gymnastic classes that were formed last year. As then, all pupils physically able are required to take the exercise. Too much must not be expected of this physical training, as but one lesson a week is given. Still it is too valuable to give up. The pupils enjoy the work and are now doing it well, they learn a good system of gymnastics, and during the exercises there is opportunity to suggest many things that are useful in preserving the health and strength of the body. Already some good results can be seen, although this training was introduced but little over a year ago.

Standards.

The school has again been put on the approved list for three years by the New England College Entrance Certificate Board. This gives the school authority to send pupils to thirteen New England colleges without their being obliged to take examinations. This approval is given on the record of the work done by the pupils we send to these colleges. These pupils are given the same instruction that all the scholars in the school have; we do not have separate classes for those going to college and for those who are not. The only requirement that is demanded of them is that they attain a rank of eighty-five per cent. If they do not reach this rank they are obliged to take examinations. This incentive, however, is not necessary to cause the pupils to do good work. Many who do not intend to go to college secure this rank. A reference to the list of honor pupils from year to year will show that a good percentage reach a considerable higher grade than eighty-five per cent.

In order to receive credit for any subject studied, a pupil must secure seventy per cent every term. If this mark is not secured, the work must be made up, either by examination, or by repeating the work with another class, depending upon the degree of failure. This pass mark is attainable by practically all pupils who are willing to do sufficient studying. After pupils have once entered the high school, more leave before the course is finished because of failure to keep up in their work than for any

other reason.

The Educational Unrest.

Education is a common topic for discussion everywhere. No phase is overlooked; the work of the elementary school, the high school and the college are all scrutinized. This is a very hopeful sign, and indicates that our educational system is likely to meet the needs of our democratic civilization with increasing success. I will refer here to only two of these topics. The first concerns both the elementary and the high school; the second relates to youth of the high school age.

The first topic is connected with the endeavor to improve the health of the pupils of the public schools and to prevent the contraction of contagious diseases. Every community may well consider what it may do in this direction. One common plan is to have some kind of medical inspection of all the pupils. During the last year several states passed laws requiring such inspection.

The other topic relates to those boys and girls who leave school as soon as the law will allow them. No mat-

ter how well suited the schools may be made to meet the needs of all children, many will leave at the legal age, and some even find ways of leaving before this time, contrary to law. For example, according to the last report of the Commissioner of Education of the United States there were 723,625 pupils in the first grades of the country; those in the eighth grades numbered only 224,970. (These figures do not include boys and girls in places with fewer than 4000 inhabitants.) These statistics well indicate how few, comparatively, ever finish even, the

grammar school.

To meet these conditions several plans have been made. One is to have evening schools which pupils may attend or not as they please; another is to have high schools arranged in such a way as to allow pupils to work part of the time and attend school part of the time; a third is to establish schools that will be serviceable to those that are learning a trade, and then to require by law that they be attended for a considerable period of time. This latter plan is common in Germany. It seems likely that not much advance will come until compulsory attendance is required of all boys and girls in some sort of school, until they have reached an age considerably beyond fourteen.

The time is not ripe, perhaps, for Franklin to take up this work to any large extent, but these questions will have to be considered, and decided upon at some time. Meanwhile, the more thought that is put upon the mat-

ter, the better will be the decisions reached.

Respectfully submitted, HARRY PREBLE SWETT, Principal.

Report of Supervisor of Drawing.

Mr. W. H. Slayton Supt. of Schools:

I herewith submit my second annual report.

No marked change in the course followed in previous years has been made, though we have given somewhat more time to the study of the theory of color and its application in design.

In the winter term, 1909, one problem in weaving or other handicraft was worked out by each of the grades.

With one or two exceptions the results were satisfactory. The advantage is evident of providing some such work, especially during the winter weather, when noon and recess periods are often spent indoors, but since much of this manual training is necessarily done in school hours and in the time allotted to drawing, there is a question as to how far it should be allowed to supplant a subject which ought to go hand in hand with it.

In the high school the work of the sub freshman class has been an encouraging feature. The advantage of two successive periods for drawing weekly has been very evident as shown both by the quality and amount of work accomplished and by the interest of the pupils.

The aim of our course is threefold: The training of the child (1) in the appreciation of beauty in nature and in art, (2) in facility of expression (3) in neatness and efficiency of execution. We do not think that by painting landscapes in the grades we are making an artist of the average child, nor do we expect that his drawings of flowers or of birds, are to compare with the excellent pictures of both with which he is familiar through his school books and other mediums. But we are sure that after a boy or girl has tried to paint a sunset, or a dandelion, he sees things in both that he has never seen before. To children of the lower grades especially, drawing is only another and very delightful way of saying things, and a language or geography lesson worked out by the aid of this second mode of expression has a permanent value that is lacking in one where no attept at picturing the event or lpace in question is made. As for the third purpose, that of securing neatness of execution, we have only to note the admiration of a whole class for the one boy or girl who is neat, accurate and capable, whose work always "comes out well," to recognize the value of the constructive element in our school drawing.

I take this opportunity to thank the teachers, whose co-operation throughout the year has been very helpful.

Respectfully submitted,

JOSEPHINE EMERY.

Report of Supervisor of Music.

Mr. W. H. Slayton Supt. of Schools:

What I have to say is chiefly concerning the "Harmonic Music Course," which was placed in the first three grades at the beginning of this school year. This course is almost an ideal one, containing scales for vocal drill, which are selected from the works of the greatest authorities on these subjects, and it seems should be valuable in promoting clear and rapid enunciation and articulation and at the same time cultivate a pure and musical quality of tone. Other strong features are the attention paid to ear training (which includes changing the Do, oral tonal dictation and oral metric dictation) and eye training (which deals with written tonal dictation and written metric dictation.) The charts have some most excellent interval drill work and a wealth of exercises from books and charts, and plenty of good songs complete this most splendid music course.

All grades above the third are still using the "Modern" books, the idea being to not make a break in the continuity of the work, but let classes complete the course

already begun.

As I have already said, the "Harmonic" is in use as far up as the third grade, and as these third grades become fourth grades next year, they will be supplied with fourth year material and so on until the whole system is in use.

The "Laurel Music Reader" has been placed in the seventh and eighth grades in the Nesmith school, and although it has been in use only a few weeks, it promises well. Unquestionably the work is in better condition than it was one year ago. The High school chorus is better than it was one year ago and the outlook is encouraging. At this time I wish to thank the officials, the teachers and all others who have helped make my work so pleasant during the year.

Respectfully submitted, FRED H. OSGOOD.

RESOLUTIONS.

In the year of our Lord one thousand nine hundred and nine.

A resolution relating to the weekly pay roll.

Resolved, by the City Council of the City of Franklin,

as follores:

That the Mayor be and hereby is authorized to draw his draft each week for the payment of the weekly pay roll of the highway and sewer departments.

Approved. ENOS K. SAWYER, Mayor.

Passed January 4, 1909.

A resolution for the discontinuance of certain highways crossing the old Town Farm.

Resolved, by the City Council of the City of Franklin,

as follows:

That the two highways laid out by the Selectmen of Franklin, September 1st, 1888, over what was then the

town farm for the accommodation of certain individuals asking for the same be and hereby are discontinued, said individuals being now fully accommodated by other roads since built by the town.

Approved. ENOS K. SAWYER, Mayor.

Passed October 5, 1909.

In the year of our Lord one thousand nine hundred and nine.

A resolution relating to charges against the Highway

Commissioner.

Resolved, by the City Council of the City of Franklin,

as follows:

That the Mayor and Committee on Highways constitute a committee for the purpose of investigating and report at the next meeting of the present City Council to be held January 3rd, 1910, as to the truth or falsity of the charges and reports made against the Highway Commissioner to the effect that the Commissioner in violation of a resolution adopted at the January meeting, 1908, and re-affirmed at the January meeting, 1909, which provided that his salary should be "in full for his services and driving team," did keep his drawing team a greater or less part of the year at the expense of the city.

Approved. ENOS K. SAWYER, Mayor.

Passed December 28, 1909.

ORDINANCES.

An Ordinance relating to sewers.

Be it ordained by the City Council of the City of Franklin as follows:

Section 1. That the resolution of the City Council adopted May 10, 1895, relating to sewers, be and the same hereby is so far modified as to provide for a special assessment or charge only on such persons or corporations as have already, or may hereafter, connect with the new system of sewerage.

Sec. 2. That no person or corporation shall be required to connect with any sewer except by direction of the Board of Health of the city or the City Council.

Sec. 3. All persons who have already, or shall hereafter connect with the new system of sewerage, shall pay to the city the following sums, to wit: For each tenement of seven rooms or less, fifteen dollars; for each additional room in a tenement in excess of seven, two dollars.

Space in buildings occupied wholly or in part for stores, manufacturing, or other purposes than private barns, cellars and store houses or store rooms, or outbuildings, shall be reckoned and paid for on the basis of one hundred and fifty square feet of floor space as one room when connected with the sewer.

Sec. 4. All persons who have already connected with the new system of sewerage shall pay to the City Clerk the amounts for which they are liable under the provisions of Section three within thirty days after the passage of this ordinance, with interest thereafter, and the City Clerk is hereby directed to collect the same.

Sec. 5. No person shall hereafter connect with any public sewer without first obtaining a permit therefor signed by the City Clerk and countersigned by the Highway Agent, and before such permit is issued to connect with the new system of sewerage such person shall pay to the City Clerk the sums for which he would be liable under the provisions of Section three.

Sec. 6. In any case where connection with a sewer is made by the Board of Health, through the neglect or refusal of the owner to comply with their orders so to do, the amount provided to be paid therefor in Section three shall become at once due and payable and collected by the City Clerk, but the City Clerk may issue a permit in such cases without prepayment.

Sec. 7. Every permit to connect with any public sewer issued by the City Clerk shall contain the name of the owner, the number of tenements and rooms in each for which the permit is granted, the location of the tenements and amount paid for such permit, a record of which shall be made by the City Clerk in a book kept for that purpose.

Sec. 8. All connections with any public sewer shall hereafter be made under the supervision of the Highway Agent and in accordance with his directions, and it is hereby made the duty of the Highway Agent to see that all such connections are securely made and in the safest and best manner, and that only proper pipe and other materials are used.

Sec. 9. No person or corporation shall deposit any garbage, ocal, filth or any substance having a tendency to obstruct the flow of sewage in any manhole, flush tank or sewer opening.

Sec. 10. All fixtures connected with private sewers leading to the public sewers shall be provided with suitable traps and strainers to prevent the introduction of all solids or anything that would obstruct the flow in the pipes.

Sec. 11. Any person violating the provisions of Sections five and eight, nine and ten of this ordinance shall be fined not less than twenty dollars.

Sec. 12. This ordinance shall take effect upon its passage. Approved.

E. H. STURTEVANT, Mayor.

Passed May 4, 1896.

An Ordinance relating to building in the compact part of the city of Franklin, as follows:

Be it ordained by the City Council of the City of Franklin as follows:

Section 1. No buildings shall hereafter be erected on the north side of Central street, between Sanborn bridge and Daniell bridge, on the south side of Central street between Sanborn bridge and Church street, on Franklin street between Central street and Church street, except the same is constructed with solid outside brick walls at least twelve inches thick.

Sec. 2. This ordinance shall take effect upon its passage. Approved.

E. H. STURTEVANT, Mayor.

Passed May 4, 1896.

An Ordinance relating to sewers and in amendment of an ordinance passed May 4, 1896.

Be it ordained by the City Council of the City of Franklin, as follows:

Section 1. Any person connecting with a public sewer, who will sign a written request therefor, may pay an annual rental or tax as follows: For each tenement of seven rooms or less, \$2. For each additional room, in a tenement, thirty cents payable in advance. The first payment when

the permit is granted, subsequent payments to be collected by the Collector with other taxes.

Such rental shall cease whenever such party shall pay the fee heretofore prescribed and any sums due for such rental.

Sec. 2. This ordinance shall take effect upon its passage. Approved.

E. H. STURTEVANT, Mayor.

Passed Nov. 2, 1896.

An Ordinance for the promotion of cleanliness in public streets and places.

Be it ordained by the City Council of the City of Franklin, as follows:

Section 1. No person shall distribute in any public highway, within the city, any printed hand-bill, circular, or advertisement of any kind.

- Sec. 2. No person shall place, throw or deposit upon any public highway, within the city, or upon any sidewalk therein, any paper, garbage, waste or refuse matter of any kind.
- Sec. 3. No person shall spit upon the floor of any public conveyance, shop, store, hall, church, school house, railroad station or other public building in said city, or upon the steps of said conveyances or buildings, or upon the sidewalk of any public street or way in said city.
- Sec. 4. Any person convicted of any violation of either section of this ordinance shall be fined not exceeding ten dollars.
- Sec. 5. This ordinance shall take effect from and after its passage.

Approved.

FRANK H. DANIELL, Mayor.

Passed October 2, 1899.

An Ordinance relating to cemetery trust funds.

Be it ordained by the City Council of the City of Franklin, as follows:

Section 1. That Chapter 40, Session Laws of this state for 1899, in which it is provided that (section 1):

"Any town or city which now holds, or hereafter may hold in trust, by bequest or otherwise, any fund for the care of any cemetery or private lot therein, may pay the same into the town or city treasury, and so long as the same remains therein, said town or city shall pay thereon an annual income at the rate of three and one-half per cent., which income shall be expended in accordance with the terms of the trust by which said fund or funds is held. (Section 2.) This act shall not be in force except in such towns and cities as by vote of the town, or City Council shall so elect."

Be and hereby is adopted and in force in this city, and the City Council so elects.

Sec. 2. This ordinance shall take effect and be in force upon its passage.

Approved.

RUFUS G. BURLEIGH, Mayor.

Passed September 3, 1900.

An Ordinance in relation to the duties of the City Auditor.

Be it ordained by the City Council of the City of Franklin, as follows:

It shall be the duty of the City Auditor annually, in the month of December, to examine the accounts of the Collector of Taxes and to notify every delinquent tax-payer of the amount of his taxes remaining unpaid, by mailing to each in a sealed envelope a copy of this ordinance, together with a statement of the balance due as it appears upon the tax list.

Approved.

RUFUS G BURLEIGH, Mayor.

Passed December 3, 1900.

An ordinance in relation to licensing dealers of junk.

Be it ordained by the City Council of the City of Franklin, as follows:

Section 1. That all dealers in old metals, rubbers, rags or junk of any sort shall be licensed.

The said license shall be issued by the City Clerk upon recommendation of the Mayor.

The cost of said license shall be three (3) dollars per annum, dating from April 1, for the year ensuing.

- Sec. 2. That no dealer shall buy of any minor, under fifteen years of age, any old metals, rubber rags or junk of any sort, without written consent of their parents or guardian.
- Sec. 3. Any person convicted of violating the provisions of sections 1 and 2 of this ordinance shall be fined a sum not exceeding twenty (20) dollars for each offense.
 - Sec. 4. This ordinance shall take effect upon its passage. Approved.

RUFUS G. BURLEIGH, Mayor.

Passed April 1, 1901.

An Ordinance relating to the names of streets and their numbers.

Be it ordained by the City Council of the City of Franklin, as follows:

Section 1. That the names of the streets of the city of Franklin shall be as indicated on the map in the annual

report of the city of Franklin, of 1895, with addition of new streets and avenues since laid out with the following exceptions: That the southern section of Pemigewasset street, running east from North Main street, shall be known as Gerrish street. That the street running from Depot street to Franklin Heights shall be known as Summit street. That the street leading north from Summit street to Pleasant Valley shall be known as Valley street. That the street west of Valley street, leading south from Summit street, shall be known as Gilman street. That the street running north from Central street, near Republican bridge, to Cate brook, shall be known as Glenwood avenue. That the street running northwest from Bow street over Cheney hill to Glenwood avenue, shall be known as Cheney street. That the street running west from Bow street past what is known as Davis' block to Glenwood avenue, shall be known as Glen street. That the section of Maple street, running north from foot of Willow hill, then east to that section of Maple street running north, shall be known as Willow street. That the section of Winnipiseogee street running south from Central street to that section running east, shall be known as River street. The street running east, then north from Franklin street, opposite Church street, shall be known as Ayles Court. That the section of High street east of the Franklin & Tilton R. R., shall be known as East High street, and that section west of said railroad shall be known as West High street. That the street running east from Memorial street to Smith street shall be known as Canal street. That the name of Peabody avenue shall be changed to Peabody place. name of Railroad avenue shall be changed to Railroad street

Sec. 2. The Mayor and Council shall from time to time, as the convenience of the public may require, designate the numbers to be affixed to the buildings on the several streets and squares in the city, and shall designate the names of new streets when laid out. In all streets the odd numbers

shall be on the right hand side, and the even numbers on the left hand side of the streets in the progressive order of numbering, commencing with the lowest numbers and proceeding therefrom with increasing numbers as follows: The numbering of North Main street shall commence at the southerly end at junction of Central and South Main streets. The numbering of all streets connecting with North Main shall commence at North Main street. numbering of South Main street shall commence at the northerly end at junction of Central and North Main All streets connecting with South Main shall commence numbering at South Main street. The numbering of Summit, Wells and Salisbury streets shall commence at Depot street. The numbering of Valley and Gilman streets shall commence at Summit street. The numbering of Central street shall commence at the westerly end at junction of North and South Main streets. All streets conneeting with Central street, except Bow and Pearl streets, shall commence numbering at Central street. Bow street shall commence numbering at what is known as Paper Mill square. All streets connecting with Bow street shall commence numbering at Main street. The numbering of South Main street shall commence at Glenwood avenue. numbering of Pearl street shall commence at the southerly end. The numbering of Canal street shall commence at The numbering of School, West, High, Memorial street. and Winnipiseogee streets shall commence at River street. The numbering of Ayles Court and Grove street shall commence at Franklin street. The numbering of Railroad, Elkins and View streets shall commence at School street. The numbering of East High and Russel streets shall commence at Railroad street. The numbering of Spring street shall commence at Prospect street. The numbering of all streets running east from Prospect street shall commence at Prospect street. The numbering of all streets east of Prospect street running parallel with Prospect street shall commence numbering at the northerly end. All streets connecting with Sanborn street shall commence numbering at Sanborn street.

Sec. 3. Every entrance to a building fronting the street shall be designated by a separate number. In the residential portion of the city every lot with a twenty-five-foot front shall be designated with a separate number, and in the business portion of the city every lot with a twelve and one-half-foot front shall be designated with a separate number. The business portion of the city is embraced within the following limits: North and South Main street between Webster and Depot streets, Central street between River street on the west and Bow street on the east, Smith, Canal, Memorial and Church streets and Franklin street from Central to School streets.

Sec. 4. Any person who shall affix or suffer to be affixed to or shall allow to remain upon any building, any different number from the one designated by the Mayor and Council, shall be fined not less than one or more than five dollars, and a like penalty for every day he shall suffer such building to be so numbered after his first conviction of violating the provisions of this section.

Sec. 5. That measurement of each street in the city shall be made according to provisions of section three of this ordinance, determining the correct number of every entrance as provided for in section three of this ordinance, and that a correct record of same shall be kept on file in the office of the City Clerk in a convenient manner for the reasonable use of the public at all times. That there shall be transmitted by the person authorized by the committee on ordinances to make said survey, a notice and statement giving name of the street, the name of the owner, the name of the occupant, and the number of the building, together with instructions for procuring and fixing same.

Sec. 6. That the owner of the property shall within sixty days after receiving said notice as per section five of this ordinance, cause to be affixed to every entrance of a building fronting the street, mentioned in said notice, a metallic

or other suitable number at least two inches in height, and so situated as to be plainly visible at all times from the street.

Sec. 7. If the owner of any building, after receiving said notice as per section five of this ordinance, fail to comply with the provisions of section six of this ordinance, the said owner shall be fined not less than one or more than five dollars, and a like penalty for every day which the said owner shall neglect so to do after his first conviction.

Sec. 8. This ordinance shall take effect on its passage. Approved.

RUFUS G. BURLEIGH, Mayor.

Passed April 1, 1901.

An Ordinance in relation to attendance of scholars.

Be it ordained by the City Council of the City of Franklin, as follows:

Section 1. Any child in the city between the ages of six and sixteen years, without a regular and lawful occupation, who shall, except in cases of ill health, be absent from school more than one day during the space of any one month, unless excused by the teacher of the child, shall be fined not exceeding ten dollars for each offense.

Sec. 2. This ordinance shall take effect on its passage. Approved.

RUFUS G. BURLEIGH, Mayor.

Passed May 13, 1901.

An Ordinance relating to fire alarms.

Be it ordained by the City Council of the City of Franklin, as follows:

Section 1. When an alarm of fire has once been given upon the fire alarm system of the city, it shall be the duty

of the person giving the alarm to remain at the box in charge of the same until the arrival of some person detailed to guard such box, except when the fire is upon the premises of the person giving such alarm.

Sec. 2. No person shall ring in a second alarm except under the direction of an engineer of the fire department.

Sec. 3. The chief engineer, or in his absence one of the assistant engineers, shall at once, upon the sounding of an alarm upon the fire alarm system, detail some person to supervise and watch the box from which the alarm was given, and it shall be the duty of such person to remain at said box and protect the same from any person interfering therewith until he is relieved by said engineers.

Sec. 4. Any person violating the provisions of this ordinance or disobeying the orders of an engineer under it shall be liable to a fine not exceeding twenty dollars for each offense.

Sec. 5. This ordinance shall take effect on its passage. Approved.

RUFUS G. BURLEIGH, Mayor.

Passed June 3, 1901.

An additional Ordinance for the promotion of cleanliness in public streets and places.

Be it ordained by the City Council of the City of Frankling as follows:

Section 1. No person or corporation in possession or control of any real estate adjoining a public street, shall place or permit to remain on the premises so occupied by him, any paper or waste matter or substance of any kind, in such a position or place that the same can be carried by the wind upon a public street.

Sec. 2. Every person or corporation keeping for sale at retail on premises adjoining a public street, fruit, nuts, or other goods from which waste is liable to be thrown upon such street, shall keep the highway abutting on the premises occupied by him to the center thereof free and clear of waste substances and matter from such class of goods as are kept for sale by him at such store, and shall keep and maintain in a wholesome condition all such receptacles for waste matter as may be located by the city upon or adjoining the premises occupied by him.

Sec. 3. No person shall injure, disfigure, destroy or remove any receptacle for waste matter placed by the city upon any public street or place, or place therein any substance for which such receptacle was not designed.

Sec. 4. It shall be the duty of the city marshal and every policeman when on duty to see that this ordinance is strictly observed, and when unable to cause the removal of any such waste matter from the streets by the person depositing the same, he shall forthwith remove the same himself.

Sec. 5. Any violation of this ordinance shall be punished by a fine not exceeding ten dollars.

Sec. 6. This ordinance shall take effect on its passage. Approved.

RUFUS G. BURLEIGH, Mayor.

Passed Aug. 5, 1901.

An Ordinance relating to injury to the highways and other city property.

Be it ordained by the City Council of the City of Franklin, as follows:

Section 1. No person shall with any trenching tool or machine displace the surface of any highway within the city boundaries without permission from the Council or from the chief of the highway department, as the case may be.

Sec. 2. No person shall erect, raise or place any sign, bill-board or other obstruction on or within any highway, nor shall any such person erect, raise, place or affix sign, bill-board or advertisement on any lands of the city or any building thereon without consent previously obtained from the Council or head of the appropriate department.

Sec. 3. Any person violating any provisions of this ordinance shall be fined ten dollars for each and every offense. Approved.

ISAAC N. BLODGETT, Mayor.

Passed May 2, 1904.

An Ordinance relating to pawnbrokers.

Be it ordained by the City Council of the City of Franklin, follows:

Section 1. No person shall carry on the business of a pawnbroker, within the City of Franklin, unless he is duly licensed therefor by the Board of Mayor and Council. Said Board of Mayor and Council shall, upon application, issue licenses to do business as pawnbrokers to such persons as said Board deem proper; and such licenses shall be for one year from their issue, but may be revoked at any time by said Board of Mayor and Council whenever in their opinion the public good requires. Such licenses shall designate the place where the person licensed may, carry on his business, and he shall not carry on the business at any other place within the city; and the fee for such license shall be ten dollars per year.

SEC. 2. Every person licensed as aforesaid shall keep a book or record at his place of business in which he shall enter in English at the time of receiving the same, a minute description of any article left for pawn, particularly mentioning any prominent or descriptive marks on the same, with the name, age and residence, giving the street and number, where possible, of the person from whom he received it, noting also the day and hour and the amount paid or loaned thereon; and such book or record, and the articles left for pawn, shall at all times be open to the inspection of the Chief of Police or any person authorized by him. No person licensed as aforesaid shall directly or indirectly receive any article in pawn from any minor, knowing or having reasonable cause to believe him to be such, without the

consent in writing of the parent or guardian of such minor. And all persons so licensed, when requested to do so by the Chief of Police, shall make a daily statement to him of the articles left with them for pawn.

SEC. 3. If any person shall do business as a pawnbroker without obtaining such license, or if any person licensed as aforesaid shall violate the other provisions of this ordinance, or any of them, he shall be punished therefor by a fine not exceeding ten dollars for each offence.

SEC. 4 This ordinance shall take effect upon its passage.

Approved.

GEORGE E. SHEPARD, Mayor.

Passed Nov. 6, 1905.

In the year of our Lord one thousand nine hundred and nine.

Be it Ordained by the City Council of the City of Franklin as follows:

No automobile or motor cycle shall be operated upon any public highway outside the business district or the compactly built sections of the city at a speed greater than twenty-five miles an hour, or within the business district or compactly built sections of the city at a speed greater than ten miles an hour.

All ordinances inconsistent with this ordinance are

hereby repealed.

Approved. ENOS K. SAWYER, Mayor. Passed May 17, 1909.

In the year of our Lord one thousand nine hundred and nine.

An ordinance relating to the fence west of the Free Public Library.

Be it Ordained by the City Council of the City of Franklin as follows:

Section 1. The sitting upon or leaning against the fence or rail extending west from the Free Public Library to the bridge across the Winnipiseogee River shall constitute a misdemeanor, and any person guilty of said offence shall be punished by a fine of not less than ten dollars.

Section 2. This ordinance shall take effect upon its passage.

Approved. ENOS K. SAWYER, Mayor.

Passed July 6, 1909.

VITAL STATISTICS.

TO THE CITY COUNCIL OF THE CITY OF FRANKLIN: In compliance with an act of the Legislature, passed June Session, 1887, requiring "clerks of towns and cities to furnish a transcript of the record of births, marriages and deaths to the numicipal officers for publication in the annual report," I hereby submit the following:
